1. Ozlem Kirmizi
2. Aaron Horler
3. Kim Luu
4. Melissa Nguyen
5. Dennis Mihalache

This document is an outline of the contributions and workload of team members in the JobsAustralia.tech project. This document has the support of all team members.

Ozlem Kirmizi

Role during the development of the project was design, development, testing, and documentation.

Ozlem was always contactable throughout the project, attended all scheduled meetings, and their contributions helped to progress the project towards completion.

Communication was always kept throughout the development of the project.

Aaron Horler

Role during the development of the project was configuring development environments, development, testing, assisting with project management, and documentation.

Aaron was always contactable throughout the project, attended all scheduled meetings, and their contributions helped to progress the project towards completion.

Communication was always kept throughout the development of the project.

Kim Luu

Role during the development of the project was design, development, testing, and documentation.

Kim was always contactable throughout the project, attended all scheduled meetings, and their contributions helped to progress the project towards completion.

Communication was always kept throughout the development of the project.

Melissa Nguyen

Role during the development of the project was development (notably matchmaking), design, testing, and documentation.

Melissa was always contactable throughout the project, showed up to all scheduled meetings and their contributions helped to progress the project towards completion.

Communication was always kept throughout the development of the project.

Dennis Mihalache

Role during the development of the project was development, testing, managing tasks, setting up Trello, and documentation.

Dennis as always contactable throughout the project, showed up to all scheduled meetings and their contributions helped to progress the project towards completion.

Communication was always kept throughout the development of the project.
